

SURF 5'11"

Mitu MONTEIRO - Cabo Verde

A new model in our surfboard range

Using all our experience in the design of kitesurf boards, we have designed this new 5'11" model to make the discipline even more accessible.

Its optimized design with bamboo deck, coupled with an easy to ride and intuitive shape make it a perfect board to start surfing as well as an excellent strapless board for more experienced riders.

The 5'11" has a very easy and natural feel when initiating turns and provides quick response and a true surf feel.

With slightly more volume than the boards of the full bamboo range, the new 5'11" is more forgiving. Its rocker and single concave bottom ensure early planing and reassuring control at speed.

Its dimensions provide enough volume to smooth the learning of strapless riding and allows more experienced riders to try new tricks.
